

# LED mirror lamps

## Product features:

- Light source: Use LED packages of high efficiency, long lifetime, natural light.
- Structure: Lamp body made from aluminum alloy, high thermal conductivity
- Optical system: Mica light diffuse surface helps spread light evenly, high light transmission
- Power source: 220VAC/50Hz, high efficiency
- Lifetime: 15000 hour, 15 times longer than that of incandescent lamps, 2,5 times longer than that of compact lamps, saves maintenance expense.
- Working temperature: -10°C ~45°C
- Applied standard: TCVN 7722-1:2009/ IEC 60598-1:2008

## Economic efficiency:

- Replace incandescent, compact and halogen wall lamp
- Saves over 80% of electricity used compared to incandescent and halogen lamps
- Saves over 50% of electricity used compared to compact fluorescent lamps

## Applications:

- Used in Bathroom

**D G01L/8W**
